Internship Overview

Nestack Technologies is hiring two Cybersecurity Interns to support the development and testing of a platform for healthcare cybersecurity services. Interns will work on security research, vulnerability assessments, web/API testing, and security reporting.

Key Responsibilities

- Research security controls and convert them into platform requirements.
- Conduct authorized vulnerability assessments and web/API security testing in test environments.
- Develop risk assessments, security checklists, and reporting workflows.

- Validate security findings, recommend fixes, and document results.
- Support integrations with security assessment tools.

Requirements

- Currently pursuing or recently completed a degree in Cybersecurity, Information Security, Computer Science, or a related field.
- Understanding of networking, Linux, web/API security, authentication, and access controls.
- Familiarity with Burp Suite, OWASP ZAP, Nmap, or Wireshark.
- Experience with security projects, lab work, CTFs, or vulnerability reports.
- Basic Python or scripting skills preferred.
- Cybersecurity training or certifications are an added advantage.

Selection Process

- In-person interview is mandatory.
- Nestack Technologies does not hire candidates without an in-person interview.
