Contact: tungavidya.p@zettamine.com | 9849983472

About This Work

This work is for AI research field. Main task is to create problems and solutions for training AI models. Work is not simple typing or data entry. It needs strong subject knowledge. You will help in improving AI systems by giving logical and detailed answers.

Job Responsibilities

- Create high quality problems from your subject
- Write detailed and correct solutions
- Help in training and improving AI models
- Check answers and find mistakes in AI output
- Follow proper format and guidelines

Eligibility Criteria

- PhD is required in STEM field like Mathematics, Physics, Computer Science, Statistics, Biology, Chemistry or Economics
- Strong problem solving and analytical skill
- Good English writing skill
- Ability to work alone and meet deadlines
- Good attention to detail

Work Details

This is remote work. You will work independently. Time is flexible but minimum hours should be completed. Internet connection should be stable.

Skills Required

- Artificial Intelligence and Machine Learning basics
- Logical thinking and research ability
- Clear explanation of complex topics
- Understanding of AI model behaviour

Apply Process

Interested candidates can send profile with required details on email. You can also contact for more information.
