DATA CENTER TECHNICIAN – USA – PRUDHOE BAY – ON-SITE REBOOT MONKEY

JOB LOCATION

? Remote work from: USA

DESCRIPTION

Job Overview:

As a **Freelance Data Center Technician**, you'll provide on-demand support across Reboot Monkey's global data centers. Your primary responsibilities include:

- Installing and maintaining servers, networking equipment, and other hardware.
- Monitoring operations remotely and on-site, troubleshooting issues to maintain uptime.
- Managing and configuring Cisco and Juniper devices, ensuring secure network operations.
- Working on both Linux and Windows systems, applying patches, updates, and security measures.
- Documenting all technical activities and collaborating with remote teams to support data center efficiency and innovation.

Qualifications:

- **Experience:**
 - 3+ years in data center operations, especially in freelance or independent projects.
 - Hands-on experience with Cisco and Juniper networking devices.
 - Proficiency in Windows and Linux system management.
 - Strong understanding of TCP/IP, DNS, VPN, VLANs, and virtualization (e.g., VMware, Hyper-V is a plus).

- **Certifications:**
 - Highly desirable certifications include Cisco CCNA/CCNP, Juniper JNCIA/JNCIS, and CompTIA Linux+.
- **Education:**
 - An associate or bachelor's degree in Computer Science, IT, or a related field is preferred.
- **Additional Skills:**
 - Ability to work independently, solve problems effectively, and communicate clearly with remote teams.
 - Flexibility to travel to data centers on short notice and work outside standard hours.

Benefits:

- **Flexibility:** Choose your projects without hourly commitments, allowing work alongside other freelance or permanent roles.
- **Competitive Compensation:** Earn competitive rewards based on the tasks you complete.
- **Professional Environment:** A space to stay engaged with hands-on IT work.
- **Growth Opportunities:** Gain exposure to high-profile clients and advance your skills in the IT field.
