DATA ENGINEER

JOB LOCATION

MIDDLE CITY WEST, NA, MIDDLE CITY WEST, PA, United States

DESCRIPTION

This position for a **Data Engineer** offers a 100% remote opportunity with a strong focus on scalability, ownership, and collaboration in data engineering. Here's a summarized overview:

Qualifications:

- **Technical Skills:**
 - Strong experience with **microservices architecture** and **AWS tools**.
 - Proficient in building services using **Python** or **NodeJS**.
 - Familiarity with **columnar database warehouse technology** (e.g., Snowflake).
 - Skilled in ensuring database scalability to prevent bottlenecks.
- **Experience:**
 - 4+ years of experience in an enterprise or similar environment.
 - Degree in **Computer Science** or a related field (or equivalent experience).
 - Ability to manage competing tasks, pivot smoothly, and prioritize privacy for data.
- **Soft Skills:**
 - Strong verbal and written communication.
 - Capable of contributing to knowledge sharing and teamwork.
 - Adaptable to changing project demands and schedules.

Responsibilities:

- **Development & Design:**
 - Design and develop enterprise-level applications with **Snowflake** and

AWS.

- Take ownership of new data connection applications.

• **Collaboration:**

- Partner with data engineers, data scientists, security operations, and other teams to develop and enhance products.
- Contribute to team success through knowledge sharing and supporting team initiatives.

• **Work Environment:**

- The role encourages a work-life balance, focusing on collaboration without unnecessary interruptions.
- Opportunities to learn new technologies, contribute ideas, and architect new features.

Additional Information:

- **Compensation:** \$55-\$63 per hour (W2) based on experience and skills.
- **Benefits:** Eligible for health insurance, retirement plan, and applicable sick leave as per state law.
- **Technologies:** Experience with AWS and GCP technologies would be advantageous.

This role provides an ideal opportunity for a self-driven data engineer seeking to work in a collaborative, agile, and supportive environment.
