#### Job Description:

We are looking for a motivated Software Development Engineer Intern to join our development team. The candidate should have basic knowledge of programming languages such as Java, Python, or JavaScript and a willingness to learn new technologies. Responsibilities include assisting in software development, debugging applications, testing features, and collaborating with team members. Good problem-solving skills, communication abilities, and enthusiasm for technology are essential. This internship offers hands-on experience and opportunities for professional growth.

### RESPONSIBILITIES

- Assist in software development tasks
- Help in debugging applications
- Test software features
- Work with developers and team members
- Learn new technologies and tools
- Support daily development activities

## JOB BENEFITS

---

- Hands-on development experience
- Learning opportunity with real projects
- Professional growth support
- Team collaboration experience
