JOB LOCATION

Bengaluru, 530068, Bengaluru, Karnataka, India

DESCRIPTION

We are excited to announce an exceptional opportunity for a Director to join our client's Software Engineering Team in Bangalore. In this pivotal role, you will lead a dynamic global development team across diverse functions, working closely with Product Management, Program Management, Architecture, Procurement, and other key stakeholders. Your mission will be to deliver top-notch software solutions to customers on time and with uncompromising quality.
• *Key Responsibilities:** – A strong core product background is crucial for success.

– Effectively manage teams across multiple regions and geographies to foster collaboration.

– Engage with various teams to design and implement innovative solutions for our customers.

– Use your strategic judgment to shape the vision within your functional area, while executing operational policies and communicating progress towards objectives.

– Cultivate the growth of team members by providing them with challenging yet suitable assignments, evaluating their performance, and guiding their career development and aspirations.**Qualifications:**

– A robust 17-22 years in software application development, demonstrating professional excellence. – At least 5 years of proven leadership experience at the Director or Senior Director level.

Looking for candidates who can join immediately or latest by 1st week of Jan 2025

Join us in making a significant impact on our client’s software solutions and advancing your career in a vibrant, collaborative environment!
