STAFF UX ENGINEER

JOB LOCATION

Seattle, NA, Seattle, WA, United States

DESCRIPTION

This position as a **UX Engineer** at Google is a high-level, creative role requiring a balance of technical, design, and project management skills. Here's a breakdown of the key points:

Qualifications

- **Minimum**: Bachelor's in Engineering, Computer Science, or related field; or equivalent experience.
- **Experience**: At least 6 years in a technical, UX, or design setting.
- **Portfolio**: Required to demonstrate work, via a website or viewable link.
- **Preferred**: 8 years in a technical/UX role, 7 years in technical leadership, and 5 years in project management.

Responsibilities

- **Prototyping**: Develop cutting-edge prototypes using the latest front-end technologies.
- **Collaboration**: Work closely with UX designers and researchers, synthesizing feedback.
- **Project Management**: Handle multiple projects with tight deadlines.
- **Mentorship**: Guide junior UX engineers and peers.
- **Engineering Assistance**: Support front-end engineers in final product development.

Benefits

- **US Base Salary**: $168,000 – $252,000 annually, plus bonus, equity, and benefits.
- **Location-Specific Pay**: Pay is adjusted based on work location and individual
