INFRASTRUCTURE (REMOTE – USA)

JOB LOCATION

? Remote work from: USA

DESCRIPTION

Job Title: Software Engineer, Blockchain Infrastructure (Remote – USA)

Company: Yeah! Global

Location: San Francisco, CA, United States

Position Type: Full-Time

Job Description

Yeah! Global is hiring an innovative **Software Engineer** to focus on Blockchain Infrastructure. This role involves optimizing and developing infrastructure to support large-scale blockchain networks. We're seeking a candidate with deep expertise in distributed systems and a passion for advancing blockchain technology.

Responsibilities

- **Infrastructure Optimization:** Enhance scalability and reliability of blockchain infrastructure.
- **Protocol Development:** Contribute to the design and implementation of advanced blockchain protocols.
- **Performance Tuning:** Profile and optimize system performance to handle high transaction volumes.
- **Security Analysis:** Identify vulnerabilities and implement secure solutions to protect blockchain networks.
- **Collaboration:** Work alongside protocol engineers, security specialists, and other

teams to ensure system integrity.

- **Documentation:** Prepare and maintain technical documentation for infrastructure projects.

Candidate Requirements

- **Education & Experience:**
 - Bachelor's degree in Computer Science or related field.
 - 3+ years of experience with distributed systems and infrastructure software.
- **Technical Skills:**
 - Proficiency in **Rust**, **C++**, or similar programming languages.
 - Expertise in distributed systems and blockchain technology.
 - Familiarity with cryptographic protocols and consensus algorithms.
- **Problem-Solving:**
 - Ability to debug and resolve complex infrastructure challenges.
- **Teamwork:**
 - Strong communication skills and a collaborative mindset.

Desirable Skills

- Experience with containerization tools like Docker and Kubernetes.
- Knowledge of decentralized protocols such as **Ethereum** or **Solana**.
- Active participation in open-source projects.
- Strong interest in research and emerging blockchain solutions.
