

FRONTEND DEVELOPER – BLOCKCHAIN APPLICATIONS

JOB LOCATION

? Remote work from: USA

DESCRIPTION

Job Title: Frontend Developer – Blockchain Applications

Company: StellarCore Tech

Location: Remote – USA

Position Type: Full-Time

Job Description

StellarCore Tech is looking for a talented **Frontend Developer** to craft intuitive and engaging user interfaces for blockchain applications. You'll work on cutting-edge technology and contribute to delivering seamless experiences for our global user base.

Responsibilities

- **UI/UX Development:** Build responsive and user-friendly interfaces for web-based blockchain applications.
- **Collaboration:** Work closely with backend engineers and designers to translate requirements into functional user interfaces.
- **Optimization:** Optimize web applications for performance and scalability.
- **Testing & Debugging:** Identify and resolve front-end issues to ensure a bug-free user experience.
- **Innovation:** Implement new features while keeping up with trends in frontend development and blockchain technologies.

HIRING ORGANIZATION

Confidential

BASE SALARY

INR 27,000 - INR 50,000

DATE POSTED

? December 20, 2024

Candidate Requirements

- **Education:** Bachelor's degree in Computer Science, Software Engineering, or equivalent experience.
- **Technical Skills:**
 - Proficiency in **JavaScript**, **React**, **Vue.js**, or similar frameworks.
 - Strong knowledge of **HTML5**, **CSS3**, and responsive design principles.
 - Familiarity with integrating RESTful APIs and Web3 libraries.
- **Problem-Solving Abilities:** Analytical skills to troubleshoot and enhance frontend performance.
- **Team Player:** Effective communication skills for collaborating with cross-functional teams.

Desirable Skills

- Experience with blockchain frameworks such as Ethereum or Solana.
- Knowledge of UI/UX best practices and tools like Figma or Sketch.
- Contributions to open-source blockchain projects.
